

ELECTRICAL CIRCUIT ANALYSIS – ESE271
SPRING 2023

Harbans S. Dhadwal
E-mail: harbans.dhadwal@stonybrook.edu
Voice: 632 8396; Fax: 632 8494
Light Engineering, Room 213

LECTURE:

Tuesday and Thursday 11:30 am to 12:50 pm,

OFFICE HOURS:

Tuesday and Thursday 9:00 am – 11:00 am

COURSE WEBSITE:

The course is registered with the [Blackboard](#)

TEXTBOOK:

Fundamentals of Electric Circuits, 6th edition. Charles K. Alexander and Matthew N.O. Sadiku, McGraw Hill (2017) 10: 0078028221

GRADING POLICY:

The course grade will be calculated using the following weights:

Test 1	20%
Test 2	20%
Comprehensive Final	60%

HOMEWORK:

Homework will be assigned on a regular basis but NOT graded for credit. However, it will be collected and evaluated for common misunderstandings. You are strongly advised to do the homework assignments by the specified time.

TEST POLICY:

- All tests will be **Closed book**.
- Student photo ID must be available for inspection.
- NO make-up tests.
- Zero tolerance for academic dishonesty.

TEST SCHEDULE: Test dates are subject to change.

Test 1	Feb 23: 11:30 am 12:50 pm
Test 2	April 11: 11:30 am to 12:50 pm
Final - cumulative	TBA

The University Senate Undergraduate and Graduate Councils have authorized that the following required statements appear in all teaching syllabi (graduate and undergraduate courses) on the Stony Brook Campus:

Student Accessibility Support Center Statement

If you have a physical, psychological, medical, or learning disability that may impact your course work, please contact the Student Accessibility Support Center, Stony Brook Union Suite 107, (631) 632-6748, or at sasc@stonybrook.edu. They will determine with you what accommodations are necessary and appropriate. All information and documentation is confidential.

Academic Integrity Statement

Each student must pursue his or her academic goals honestly and be personally accountable for all submitted work. Representing another person's work as your own is always wrong. Faculty is required to report any suspected instances of academic dishonesty to the Academic Judiciary. Faculty in the Health Sciences Center (School of Health Technology & Management, Nursing, Social Welfare, Dental Medicine) and School of Medicine are required to follow their school-specific procedures. For more comprehensive information on academic integrity, including categories of academic dishonesty please refer to the academic judiciary website at http://www.stonybrook.edu/commcms/academic_integrity/index.html

Critical Incident Management

Stony Brook University expects students to respect the rights, privileges, and property of other people. Faculty are required to report to the Office of University Community Standards any disruptive behavior that interrupts their ability to teach, compromises the safety of the learning environment, or inhibits students' ability to learn. Faculty in the HSC Schools and the School of Medicine are required to follow their school-specific procedures. Further information about most academic matters can be found in the Undergraduate Bulletin, the Undergraduate Class Schedule, and the Faculty-Employee Handbook.

Weekly lecture topics:

ESE271 Spring 2023			
Week 1		Lec #1	Basic concepts: current, voltage, power
		Lec #2	Resistor, Ohm's law, Kirchhoff's laws
Week 2		Lec #3	Nodal and Mesh analysis
		Lec #4	Circuit theorems
Week 3		Lec #5	Dependent sources and operational amplifiers
		Lec #6	Circuits with operational amplifiers
Week 4		Lec #7	Material review
		Test 1	Chapters 1 to 5
Week 5		Lec #8	Capacitors
		Lec #9	Inductors
Week 6		Lec #10	First order RC and RL circuits
		Lec #11	Second order RLC circuits
Week 7		Lec #12	Second order RLC circuits
		Lec #13	AC circuits, sinusoids and phasors, impedance, RLC circuits
Week 8		Lec #14	AC steady state, nodal and mesh analysis
		Lec #15	AC steady state, nodal and mesh analysis
Week 9		Lec #16	AC power analysis, complex power
		Lec #17	Material review for Test 2
Week 10		Test 2	Chapters 6 - 11
		Lec #18	Introduction to three phase circuits
Week 11		Lec #19	Magnetically coupled circuits, transformers
		Lec #20	Frequency response function, Bode plots
Week 12		Lec #21	Resonant filters
		Lec #22	Laplace Transform - definition
Week 13		Lec #23	Laplace Transform - properties
		Lec #24	Laplace Transform - application for circuit analysis
Week 14		Lec #25	Circuits in s-domain, transfer functions
		Lec #26	Step and impulse response. Poles. Stable circuits.
Week 15		Lec #25	Two port networks
		Lec #26	Material review
